Evaluation of ABCdd3 as a candidate gene influencing ethanol consumption in multiple models

IM Presenter^{1,2}, ME Authortoo^{1,2}, A Nother^{1,2}, DA Boss^{1,2,3} (please underline the presenting author)

Alcohol is a commonly abused drug. Genetic correlations have been reported in both human and animal models involving consumption of alcohol. There is evidence that a gene resides on mouse chromosome 9 that accounts for some of the phenotypic variance.... **250 word limit**
